Profile

Frontend web developer based in Ibadan, available to work on site. I build responsive, mobile-friendly websites and web apps with HTML, CSS and JavaScript, and I have 5 live projects online with the code on GitHub. I am looking for an entry-level frontend role where I can ship real work and keep growing.

Skills

- **Web development:** HTML5, CSS3, JavaScript
- **Practical skills:** responsive and mobile-first design, shopping cart and favourites features, admin dashboards, forms and calculators, WhatsApp ordering links
- **Tools:** Git and GitHub, GitHub Pages deployment, VS Code
- **Other:** clear communication, fast delivery, quick learner

Projects (all live)

- **GrubGlass** – Food ordering web app with menu, favourites, cart, order history and an admin dashboard. Orders go to WhatsApp. Built with HTML, CSS, JavaScript. Live
- **KOVA Store** – Online store with product listing, cart and an admin panel for managing products. Built with HTML, CSS, JavaScript. Live
- **FORGE Fitness** – Gym website with membership plans, trainer profiles, BMI calculator, FAQ and contact form. Built with HTML, CSS, JavaScript. Live
- **Blossom Restaurant** – Restaurant website with menu, favourites, cart and one-tap ordering on WhatsApp. Built with HTML, CSS, JavaScript. Live
- **Maison Table** – Restaurant delivery site with food categories, cart, saved dishes and a customer profile page. Built with HTML, CSS, JavaScript. Live

Education

- **Open American College, Ibadan** – currently studying
- **WASSCE 2025** – Federal Science & Technical College Zuru
